

May 9, 1939.

To Members of the Department of Physical Education:

It has been called to my attention that there are some students who are majors in the Department of Physical Education who are financially unable to purchase equipment for such courses as 32M and 34M; for example, tennis rackets and fencing foils.

I can appreciate the fact that some students might try to get by without having the necessary equipment, but it is also reasonable to think that if a student bought all the equipment required in the activity courses he would have a regular gym outfit.

I would like suggestions from the members of the faculty so that we could work out some sort of a scheme so that it will not be necessary for students to withdraw from courses if they are unable to purchase the equipment. Also, I would appreciate it if the instructors would send all such students to this office so that we may consult with them. Some students have gone to the dean's office and told their troubles there. I would like every one of those cases referred to this office.

I believe that we should have a faculty meeting soon to discuss methods of operating so that every individual needing the benefit of such equipment has access to it without purchasing so many implements.

I shall be glad to hear from you.

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
