

## **Engineering Summer Semester (16 weeks) (July 1-October 21)**

The enrollment schedule of the School of Engineering and Architecture for its summer semester has not yet been completed, because not all of the needs of the naval students who are to be assigned to the University on July 1 are known. Clearly, however, the regular programs in the several Engineering fields, as regularly offered, will be provided for; and both old and new students in Engineering may continue with their work on the same basis as during the preceding semesters.
