Mr. Forrest Allen  
Kansas University  
Lawrence, Kansas

Dear Mr. Allen:

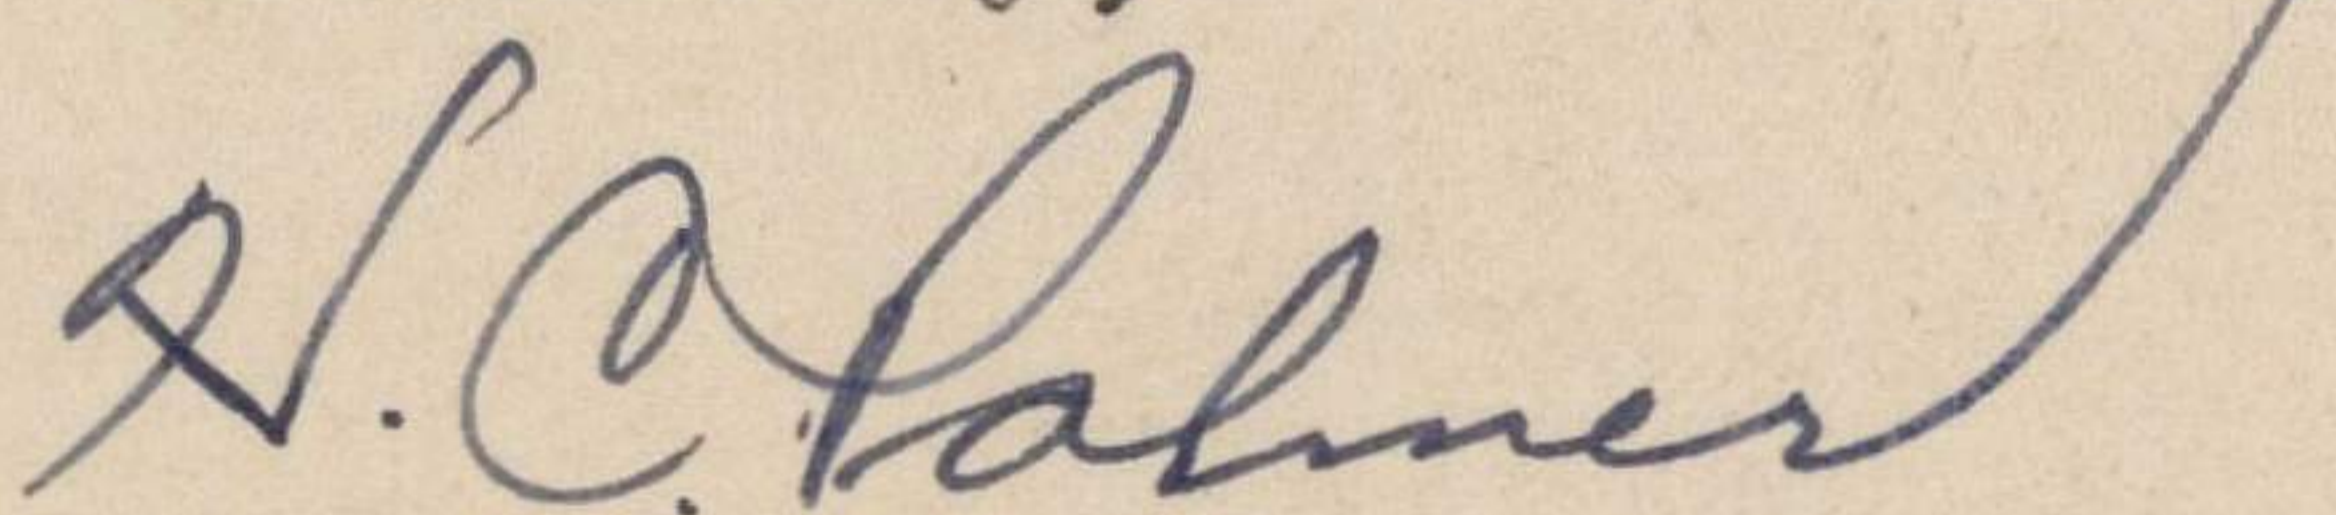

Just a word to inform you on the condition of the lad's knee, which you treated the day of the Relays.

The knee seems to be stronger and has not bothered the individual as much as before. However he has had two treatments to have the sacro-iliac placed back to normal.

We plan to keep a close check on this during the summer and hope that the knee is sufficiently improved and strong enough to compete this fall.

Thanks again, for your examination, treatment and advice.

Sincerely,

H. C. Palmer
