Muckness face

DESCRIPTION OF ABOVE PLAY

STATE TEACHERS' COLLEGE, GREELEY, COLO.

"Athlete's Foot" or Ringworm of the foot is a disease caused by the fungus, *tinea trichophyton*. It is a vegetable

This Hard Rubber Foot Bath Tray is very practical, and has been used successfully for several seasons. Comes in one size only—26x21x4 inches. Its dull black appearance does not show the stain and they retain that clean and sanitary appearance.

organism and is more resistant than common types of bacteria. Many common disinfectants or antiseptics will not affect this organism even in full strength. This ringworm organism or fungus is generally a contaminant of swimming pools, shower rooms, locker rooms, hotel rooms and other places attended by the public.

HI-KO is a sodium hypochlorite solution with a high phenol coefficient. HI-KO kills this ringworm fungus or organism. Use HI-KO before this parasite

## FOOT BATH TRAY

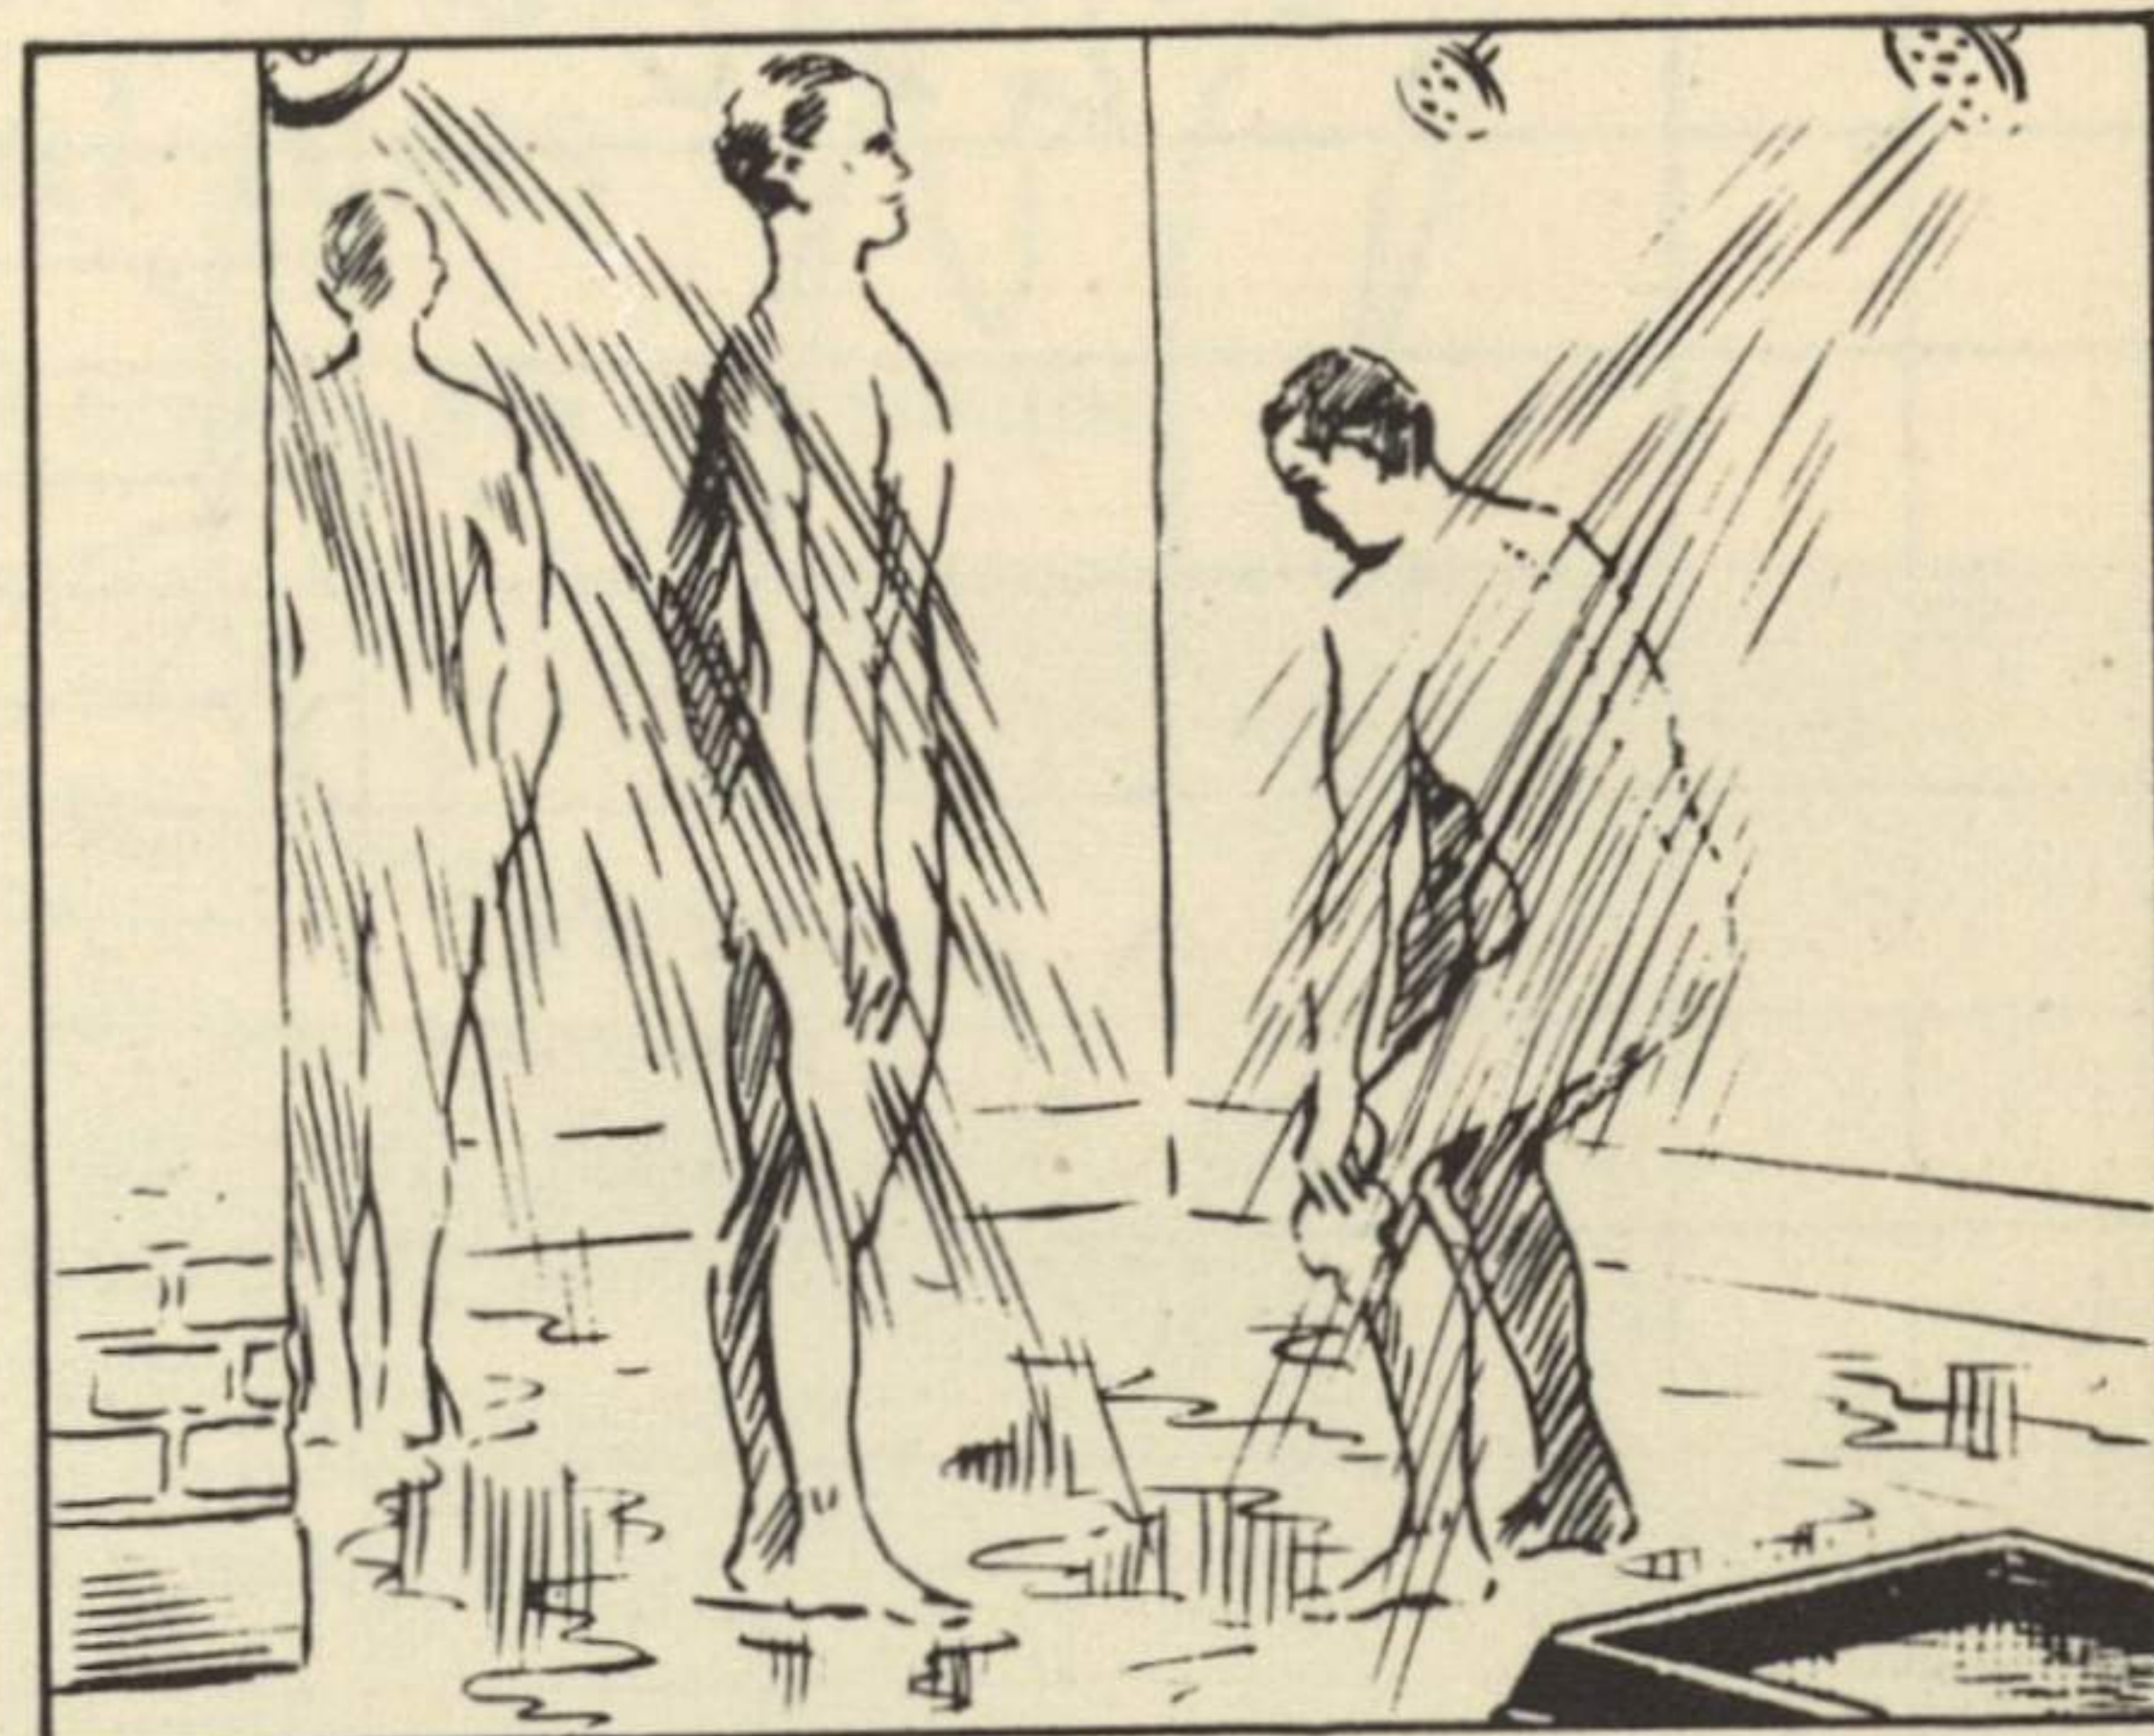

Adding 12 ounces of HI-KO to the water in the tray will prevent "Athlete's Foot." The tray should be placed so that each person must walk through the solution when entering or leaving the pool or showers.

GYMNASIUM, STATE UNIV., LINCOLN, NEB.

gets a start. HI-KO should be used to clean up the contaminated rooms where this infection is prevalent.

This Foot Bath Tray is ideal for use in pools and shower rooms. It lies absolutely flat—does not corrode from the use of HI-KO and has a spout for ease in draining. The bottom of the tray is smooth, not corrugated. Special rubber compound is used to prevent slipping.
