

what effect raising the goals would have upon courts and playing facilities throughout the country. Problems of expense, the relation of height of ceiling to height of basket, and so forth, must be considered.

Doubtless later in the season a match game between the remaining varsity players and one of the crack Army or Navy teams will be staged with the public invited to attend. Field goals will count 3 points and free throws one point. This is the ratio that Dr. Naismith long advocated.
