Mr. Walter Rouzier, Manager
Harvey House Restaurant
Union Station
Kansas City, Missouri

Dear Walter:

Several years ago Chancellor Lindley asked me to find out the name of the deodorant that the Harvey House people used in their laboratories. I wrote Henley Jentry, or someone in the Harvey House, and as I recall, it was "Deodozone." It had a rather pleasant, musk odor. I placed an order for a supply and the Chancellor was very pleased with it. I am wondering, Walter, if you can find out from some of your colleagues just what they use and where we might procure some. I would appreciate this information very much.

I trust that the summer is going well with you. Mrs. Allen and I took an eight and one-half hour run on the streamliner Saturday to Chicago to cool off and enjoyed it very much. We visited our daughter, Jane, who is in the Chicago Art Institute.

With all good wishes, I am,

Yours sincerely,
