

we are told that they had no carpenters. We asked for additional space and we have gotten no relief.

I am sure that when you took this committee assignment, like I took mine, you realized it would be no pink tea. We have been conscious of the fact that this has been our baby and it was nobody's funeral but our own. With an organized faculty in the Engineering School and in the Medical School definitely set against our program it has not been an easy job to administer. The students in these two schools naturally resented taking the work and we are just now breaking down a very bad situation created by certain faculty members. The boys in these schools who are taking the work have been marvelous. They have been good sports and now for the first time things are half-way beginning to function, but we do not have the auxiliary room that we asked for because I imagine it is impossible for Mr. Bayles to build it, and we have no relief in our clerical congestion which makes a distressing situation. I am again asking the Chancellor's Office, through Mr. Nichols, to give us immediate relief.

We gave you the list of absentees as quickly as it was humanly possible. I might further raise your ire by stating that we have between twenty-five and forty additional names to send you just as soon as we can check them. These are students with three unexcused absences.

Two weeks after school opened I called Col. Gage and asked for the list of R.O.T.C. students. I have asked for that list each week, and just today we obtained a single pencil copy. Three weeks after school opened Dean Lawson called this office and asked for a list of all R.O.T.C. people taking physical conditioning. I was unable to give it to Dean Lawson because they could not give it to me. If I could not get it for Dean Lawson I could not get it for you. Therefore, the breakdown between our department and the Military department, which you say you should not be bothered with, comes because it has been impossible to get it from them. I do not know any other method only the courteous way of obtaining this list. We have endeavored to be courteous to the R.O.T.C. and to all the departments with whom we have dealt, and we should like to ask the same forbearance from you. We have been working days and nights endeavoring to develop our leaders' corps into a squad that would be acceptable to critical faculty members and to an intelligent student body. We need more faculty members but we have been advised that there is no money for them.

Personally, I report early in the mornings and then come back in the evenings to do my coaching and I get through at ten o'clock at night. So I am not feeling very sorry for some of these other fellows who have to work extra hours.

Very sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
