

George

drive around nash, but both are fairly accurate shooters. Lebriger must be guarded fairly close with the idea in mind that he is dangerous on driving around using a "scoop" shot. Nash jukes around several times and stopped 10'-15' out and hit usually shooting an overhead pusher shot. Currence has a good left hand. He plays off the post a bit. Harvey and Cooper must be closely guarded because they shoot overhead pusher shot fading away, and also are adept with either right or left hand. Play Harvey and Cooper Close never being farther than a yard from them, with their having the ball or not. Also beware of Nash + ~~Lebriger~~ Lebriger bucking around. Remember R.U. to run 15 quick, fast steps back on defense when the ball is lost offensively and be careful of position on rebounds. Play close to man and shift by quickly on screen plays. Harvey + Cooper are dangerous around free throw line. Check man if you can't follow. Don't forget to look up and let the man guarding the man with the ball to have the right of way.

Didn't have time to write about R.U.
