Mrs. W.C. Simons  
2500 Vermont Street  
Lawrence, Kansas

Dear Mrs. Simons:

I have looked over Lowe & Campbell's catalog and I am ordering you an "Adjusto-Ray" Heat Lamp, No. V38 with handle. Herewith follows the description of the lamp:

"A modern Therapeutical heat lamp that radiates the light and heat rays of the sun in concentrated form. It is most valuable in speeding up the cure of sore and stiff muscles, sprains, torn ligaments, etc. by starting a normal circulation which relieves the congested areas."

The price is \$5.50. It is a carbon lamp which gives off infra-red and is supposed to give off some ultra violet, but not enough to be harmful to the eyes. I am not sure how much ultra violet is given off, but I know it does give off infra-red and is very beneficial.

I have ordered the lamp today and as soon as it arrives I will bring it out to you. I know that it will be helpful to you, especially in Mr. Simon's hands, because in the evenings he can use this as an adjunct to his manipulation.

I am sorry that I have delayed so long in starting the order, but now since I have started it should be forthcoming in a few days.

Sincerely yours,

Director of Physical Education and Recreation  
Varsity Basketball Coach
