

May 2, 1938.

Mr. Roger Brice,
153 South 8th St.,
Salina, Kansas.

Dear Roger:

It was a pleasure to have a short visit with you last Friday afternoon. It is unnecessary for me to acknowledge your letter of April 19 because we had a very good visit. However, I do want to say that with your talents in art, and so forth, and your experience of having worked, that there should be no difficulty at all for us to place you.

I wish you might do some simple lettering, with a cartoon of something sketched thereon so that I might see the type of work that you do. Without a doubt we can use you in making some of our display signs that are always necessary.

I would suggest that you write to Dean Donald M. Swarthout, of the School of Fine Arts, and ask him to send you a catalog and information regarding the tuition, fees, and so forth that are charged in the School of Fine Arts. As I told you, I have a daughter who graduated in the School of Fine Arts and majored in design. I found that the materials and equipment that the student is forced to buy are pretty high. The tuition and so forth is no higher than for other students in the University, but the equipment is quite an item. Outside of that consideration I am very sure that if you save your money that you will be able to make it through the University quite successfully, because I detected in you a very serious concern to master something that would help you in later life.

While your athletics are important in that they serve a very useful purpose to a fellow who has skills along that line, the main and outstanding stimulus should be the mastery of a profession or a skill that will enable him to better himself as he journeys through life.

Write me from time to time, and if I can help you on any other basis I assure you that it will be a pleasure. You need not have any fear but what you will be able to get a job.

Very cordially yours,

Director of Physical Education,
Varsity Basketball Coach.
