

June 21, 1938.

Mr. Elmer Schaake,
Bethany College,
Lindsborg, Kansas.

Dear Elmer:

I am sending you a copy of L. R. Smith's letter saying that he was writing you hoping you would enroll so that he could put you in touch with some interesting positions.

How did you come out in Kansas City? I am interested.

I am also sending the letter I received from Principal Lounsbury, of Long Beach Junior College. Will you please return these two letters for our files when you have finished with them?

With all good wishes, I am

Very sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.

Dear Dutchman:

It looks like it ought to be in the bag. Here's
hoping!

Very cordially yours,

Director of Physical Education,
Varsity Basketball Coach.

June 21, 1933.

Mr. F. L. Schlagle,
Superintendent of Schools,
Kansas City, Kansas.

Dear Superintendent Schlagle:

It is a pleasure for me to commend to you Mr. Elmer H. Schaake for a possible place in your school system. I have known Mr. Elmer Schaake since he was a small boy. He has always had the fundamentals and qualifications of an excellent citizen.

While participating in all sports in Lawrence High School, under the very able direction of Mr. Mel Griffin, his coach, Schaake was frequently mentioned as a sure all-American in football, a great sprinter in track, and an excellent basketball player. In his first year at the University certain disappointing things happened that interfered with his crowning achievement. But in his senior year Elmer Schaake did everything that his friends had hoped for.

His father died while Elmer was a boy, and Judge Walter H. Thiele, at present a member of the Kansas Supreme Court, was administrator of his father's estate. Everyone in Lawrence, Kansas, whether jurist, physician, banker or minister, has always attested to the highest qualifications that reside in Elmer Schaake. He is a man through and through. He has no bad habits, and is an especially safe and valuable young man to deal with young people.

He has had large experience in coaching, and he is very sympathetic with the boys under his direction. He is married and has one small son. He has a lovely wife, and I know of no inhibitions or impediments that would interfere with Elmer Schaake going a long ways in his vocation as a teacher and a coach. It is a great pleasure for me to recommend Elmer Schaake without reservation or evasion.

Very sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.

Mr. Leo W. Shamon,
Fairfax, South Dakota.

Dear Leo:

I was glad to have you in my class, but missed you on Saturday morning. I am sorry that I did not get to tell you good-bye.

I have written the letter as I promised, and have addressed to Mr. Maurice Wolff, Superintendent of Schools at Fairfax. Having a letter of this kind will give you something tangible to show the other fellow what you have accomplished in your work should you desire to obtain another position.

If there is anything I can do, please call upon me. I assure you it will be a pleasure.

With best wishes to you, I am

Very sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.

Mr. Maurice Wolff,
Superintendent of Schools,
Fairfax, South Dakota.

Dear Superintendent Wolff:

I desire to give you the progress that Mr. Leo W. Shannon has made in an academic and athletic way here at the University of Kansas.

Mr. Shannon has obtained credit in Zoology, five hours, Comparative Anatomy, five hours, and Chemistry, ten hours - five hours in General Chemistry and five hours in Qualitative Analysis. He also has three hours credit in Psychology. He obtained this work before we had a full major in Physical Education. However, he got his baccalaureate degree in Education.

Mr. Shannon competed on the varsity wrestling team winning his varsity letters in 1927 and again in 1932. The wrestling was done under Mr. Leon Bauman, who was national collegiate champion from Oklahoma A. and M. College, and who came to the University of Kansas as wrestling coach. Mr. Shannon was also on the varsity swimming team under Mr. Herbert G. Alphin the same years, 1927 and 1932.

Dr. James Naismith, at that time head of Physical Education, and famed as originator of basketball, was very fond of Mr. Shannon and gave him much attention. Mr. Shannon took his hygiene and gymnasium work under Dr. Naismith.

I am very happy to certify to Mr. Shannon's diligence, sincerity of purpose, and all-around worth as a man. He is clean and does his work for the love of doing a splendid job. He is a fine influence among young men. I am very happy to make this testimony regarding Mr. Shannon's character, personality and ability.

Very sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.

Superintendent F. L. Schlagle,
Kansas City, Kansas.

Dear Superintendent Schlagle:

I am especially interested in a very promising young man by the name of Gordon Clucas. He is a senior in the College of Liberal Arts and Sciences, and will graduate at the end of this summer term. His major is zoology, and he has to his credit 38 hours of biological sciences. His minor is in Physical Education.

He is one of the most outstanding young men in recreation and physical education that I have met. His I.Q. is very high, and he has a splendid personality. I am writing you so that I may call your attention to him, and before he leaves for St. Louis, his home, I would like for him to stop and meet you.

Of course I understand that he must have had at least two years of experience before he would be considered for your system, but I think he has something that few men in physical education possess at the present time. I want you to keep a friendly eye out for him as he will be worthy of your consideration. I will appreciate it if you will let me know if it would be agreeable should he stop in some time and have a chat with you.

Very cordially yours,

Director of Physical Education,
Varsity Basketball Coach.

OFFICE OF ADMINISTRATION
BETHANY COLLEGE
LINDSBORG, KANSAS

June 26 - 38

Dear Doc,

Thanks very much for your kind recommendation to Mr. Schlagle. I am sure if I land the job I have you to thank. I don't know what kind of an impression I made with Schlagle, but I believe Mr. Harmon is OK. He told me after our interview with Schlagle that I had a 50-50 chance. He said, he thought I should know that. Schlagle seems to be more interested in the teaching than in the coaching, at least that is the impression he gave me. I don't know when they will decide, because Schlagle left on a three weeks vacation last Thursday. I think I will write Schlagle a letter stating I understand the job and the situation clearly and I am willing to cooperate with all concerned. I'll do that sometime this week, so it will be there when he returns.

OFFICE OF ADMINISTRATION
BETHANY COLLEGE
LINDSBORG, KANSAS

Mr. Kehlagle didn't mention the salary to me, but Mr. Harmon said he thought it would be O.K.

I certainly hope I will be appointed as the future seems much brighter there than here, and if there is anything else you think I should do, please let me know.

John L. Lounsbury wrote me that the job has been filled, so that's one I won't have to worry about.

I signed up with L. R. Smith, just to see what they could do.

I am certainly glad that I attended coaching school as I found out a great many things I did not know, especially about the treatment of injuries.

I am returning for your files the two letters you sent me.

Very sincerely yours

Elmer Scholake

P.S. Copy you can read this, but couldn't get close to a typewriter.

BASIC DIVISION
OF THE
COLLEGE

DEPARTMENT OF PHYSICAL EDUCATION
AND ATHLETICS

Dear "Doc"

Your good letter telling me about Dr. Potrat being out there. I am certainly glad you two men were able to meet especially since both of you were and are yet so much involved in the molding of my life. Possibly neither of you would be so proud of me but I am sure all of your efforts were not futile. At least you will give me credit for choosing two such outstanding men as models

I would like to have heard all of the conversation.

I thought I had written you thanking you for the basket-ball book. I am not satisfied with it tho

for it was to be autographed. Guess
I will have to send it out to
you to be autographed. I don't be-
lieve you left anything out of
your book. I think it has helped
my team over some rough
spots. Each one of my squad
will have one as a gift at
the end of this season.

We are now tied for conference
lead. Have one more to go
with U.N.C. Beat Duke 49-45
12 wins 2 losses not so bad.

I see you beat Oklahoma 41
38. That is what New York
times gave out. I hope it is
correct. You will have to excuse
this hurriedly scribbled note. More
next time. Ruth joins me love
to the Allens. Sincerely
Ray, Jr. Senior

February 25, 1938.

Mr. Ray Sermon,
Basketball Coach,
North Carolina State College,
Raleigh, N. C.

Dear Ug and Ruth:

Ray, your fine letter came yesterday and I took it down to let Mrs. Allen read it. "Ma" Allen said to me, "Forrest, if I had not known this letter was from Ray, the tone and all the expressions sound exactly like Milton." Ray, she thinks you and Mit are doubles.

I wish you might see Mit. Mit was married about a year and a half ago, and they live at Russell, Kansas. He is with the Standard Oil. They have a fine baby girl.

I wish I could write you a longer letter, but we are just getting ready to prepare for Nebraska, whom we play tomorrow. We are now leading the conference, but by a scant margin. We must beat Nebraska to stay in there.

Yes, we licked Oklahoma, 41 to 38, down at Norman.

I want to congratulate you on your great victory over Duke.

We have seven wins and one loss in the conference, and Oklahoma has six wins and two losses, and we still have Nebraska at Lincoln Saturday night, and Missouri at Lawrence on March 3rd. By winning one of the two we can tie. We must win both of them to have the championship outright, and I want you to know the Huskers are really laying for us. Make no mistake about that.

Ray, if you would like to you might send that book to me parcel post and I will be happy to autograph it for you and parcel post it back to you, and you can count on a swell autograph. Or, if you would rather wait until some time when we see each other, that will be fine.

Yes, I wish you might have listened in on the Allen-Poteat conversation. It certainly would have done you no harm.

Our love to Ruth and yourself.

Sincerely yours,

Director of Physical Education
Varsity Basketball Coach.

FCA:AH

F
/

July 6, 1938.

Dean Frank T. Stockton,
School of Business,
University of Kansas.

Dear Dean Stockton:

I am now enabled to answer your request contained in your letter of June 2, 1938. I wrote you on June 15 that as soon as opportunity presented itself I would submit as complete data as possible concerning the plant needs of physical education.

(1). Women's Building. I am submitting a sketch of the Women's Building, supervised by Professor George M. Beal on a CSEP project, and done by Jim Bouds. This building, with our excellent outdoor playing facilities, will afford the women of Kansas one of the most complete instructional, recreational and social plants in the country. It is an imperative women's need at the University of Kansas.

The Women's Building will provide facilities for many activities that have heretofore been very limited. One of the outstanding features is the 75 foot swimming pool with standard diving boards and equipment. The bowling alleys will introduce an entirely new activity to our curriculum, one which has been very popular in other schools where the equipment has been available. The rifle range, indoor archery and golf cages will permit the introduction of these courses during the winter months.

The large gymnasium will provide ample space for the gymnasium classes and team sports, such as basketball, volley ball and softball. Intramural games will not have to be played at night, but at 4:30 in the afternoon. On the roof of the two wings as well as on the gymnasium floor will be laid out courts for badminton, darts, deck tennis, shuffleboard and tennis.

The lounge with the kitchenette provides a study room, a place for small teas, parties, committee and club meetings. Adequate airy locker space, dressing booths, showers, toilets and hair dryers have been planned. The corrective room will be provided with the latest equipment for the remedial work of the students. The dance studio on the third floor with its many windows will be set up with a stage and lighting effects for dance programs and exhibitions. The class rooms will be used for the theory classes and lecture work.

We have several ways of raising funds for this building without

asking the legislature for it. This detail can come later.

(2) Grading Intramural Field. You will recall that I submitted an estimate on grading the intramural field to the Budget Committee. This estimate was made under the supervision of Professor F. A. Russell, and I believe that the Budget Committee rather agreed that they would be willing that we submit that as a biennial request to the legislature. You will recall that on this field where the students play their intramural games there is better than a 14 foot drop from the north end of the field to the south end. This not only makes it extremely dangerous, but it is well-nigh impossible to play any game of skill under these conditions.

(3) Concrete Handball Courts. These are to replace the old worn-out wooden handball courts that now stand south of Robinson Gymnasium. The estimated cost of these courts is \$5,000.

(4) Concrete Tennis Courts. Most universities, like Oklahoma, Nebraska, Missouri and Iowa State, have concrete tennis courts. All of the championship games in California are played on concrete tennis courts. Concrete tennis courts and gravel tennis courts are comparable to concrete highways and gravel roads in maintenance cost. It costs \$1.00 per day to sprinkle, roll and mark each tennis court. We plan to use the unit construction method in building the concrete tennis courts. Each court will cost about \$1,600. We had planned to erect four south of the hill.

(5) Improvement and Maintenance of University Golf Course,
\$1,800.

(6) Placing Floor Above Beams in Basketball Court in Robinson Gymnasium. This will provide additional teaching and research rooms for the Department of Physical Education. Skylights can easily be placed in the roof and dormer windows on the south to give the necessary sunlight. A stairway can readily be built from the running track to the floor level of the sky rooms. When we obtain the Women's Building then the entire space in Robinson Gymnasium can be turned over to the Department of Physical Education for our major's work. The University electrician and I have been working on this new project. I have discussed the matter with Professor F. A. Russell, but we have no estimate on the project at the present time. This gymnasium was built in 1906 for 1200 students. As it is now, we have the offices of the Athletic Department, all of the gymnasium facilities for the men and women are quartered here, as well as the teaching rooms for our new major work in Physical Education.

In addition, the gymnasium is used for the state teachers' meeting each biennium, for the W.S.G.A. Carnival, the Puff Pant Fun, and enrollment for both the fall and spring terms and the Summer Session.

This new arrangement of flooring above the beams will in no way interfere with the necessary height and lighting of the present ceiling for varsity basketball practice and for intramural games as now carried on. New lighting fixtures can then be installed, thereby replacing the old dangerous and antiquated fixtures that now exist.

(7) Replacing Potter's Lake with a Modern Concrete Swimming Pool for University Students. With proper architectural and landscaping features this improvement could be made one of the beauty spots on the campus without any of the unpleasant situations accruing. I will reserve further discussions on this until a later time.

(8) Winter Outdoor Skating Rink. This could be built on the intramural field. I have in mind the flooding of a rink area which would be definitely planned on the intramural field. This would provide safety in our winter skating activity.

(9) 100 Acre Golf Course One Mile from the University. I have in mind a very definite farm of 100 acres which would make an ideal golf course for the students and faculty of the University of Kansas. I visited the Yale Sports Fields for intramurals, and that is five miles from New Haven and the students go there for their recreation and exercise. On account of the topography of Mt. Oread it is absolutely necessary that land be acquired for play fields for the students of the University. This golf course would be one of the most beautiful in the country and the students will demand it in a short time. I am looking ahead. And my purpose is to get donors to purchase these play fields the same as we ask for scholarships and buildings. It seems just as reasonable to me to provide for the health and recreation of our youth as it is to plan for their academic training. In fact, I think more so, at times.

(10) Lawn Bowls - Bowling on the Green. This sport is definitely taking the colleges by storm. The only difficulty is to get a flat area on which to bowl. This would be a great early fall, late spring and summer recreation that we should definitely plan for on this campus.

We have nearly spoiled a fine golf course by planting trees in the fairways, and unless we have a recreation engineer to work out these things we will be growing everything but strong young men and women.

(11) Bridle Paths on the Campus. These could follow the roads and by-ways and would be a great source of recreation and enjoyment to faculty members and students.

-4-

Dean Stociton, I would like to ask a favor of you - that you read Chapter XIX, my contribution in "Higher Education in America", edited by Raymond A. Kent, and published by Ginn and Company. I would like to call your attention especially to Constructive Suggestions on pages 594 to 597. This pertains as to how the earnings from athletics could be used for physical education. Of course, this is so remote that it is not possible now. But I would like to call attention to the fact that when the charter of the University of Kansas Physical Education Corporation was drawn up that we had it worded so that the purpose of the corporation was to use the earnings, after the stadium was paid for, for play utilities for students of the University of Kansas. This is in the charter now, and provision is made as to how the money can be used.

I would like to have your reaction after you have read my chapter in "Higher Education in America". I am sending you a book which we have checked out from the library in our name. When you have finished with it please notify my office and we will call for it and return the book to the library.

There is another feature of our department which I would like to mention - that of a service program. You doubtless will get a letter this fall from our department when we send a letter to all departments offering our cooperation and supervision of all recreational equipment. This equipment will be furnished by the Department of Physical Education to other departments for picnics, breakfasts or outings. It is our purpose to furnish ping pong tables, badminton sets, soft ball or indoor baseball outfits, deck tennis, darts, volley ball, horseshoes, basketball, quoits, croquet, archery and bridge tables for the more inactive groups. We will have one of our majors in the department who will be taking some course like Community Recreation to transport this equipment to the location of the breakfast or picnic, set up the equipment, furnish the balls or other necessary equipment, and to supervise any play that is necessary. After the outing is over this material will be gathered up by the student, placed in the truck and returned to the gymnasium. There will be no charge for this service.

I have a very definite plan for rehabilitating Brown's Grove. I have definite ideas as to where we can get any building material we need, and I have already conferred with Mr. Brown. For the School of Education breakfast the other morning we did this very thing I have been telling you about. On the Fourth of July I got the truck and together with Howard Engleman, one of our students, we loaded up all of our play equipment, transported it to Brown's Grove, and set it up. The response was one of the most delightful experiences that I have had.

I expect to enlarge upon this program, but space forbids at the present time. We have a basketball goal set up there now for the adults. When we interrogate the various school departments for their cutings we expect to find out how many adults and children of the different ages will attend. We will put up a 9 foot goal for children of junior high school age and let them use a soccer ball; for the younger tots we will have a goal 8 feet in height and let them use a volley ball for their play. We expect to build toilet facilities, and luncheon tables for serving. We will also have some benches for comfortable resting places. All of this equipment will be furnished by the Department of Physical Education and it will be placed at Brown's Grove apart from the old retreat where everybody goes. I want to have it arranged with Mr. Brown that we will have priority on the dates, but of course everybody else may use it when the University departments do not care to use Brown's Grove. I have a notion that this should prove to be a real service that our department can render to the University departments.

Concerning Basketball. May I say that I have discussed the matter with Director Gwinn Henry. I told him that I was less than mildly interested in the building of a field house for basketball. Since the auditorium was built primarily as an auditorium and a basketball court, and then later we were denied the right to practice for our varsity games therein, even for two months of the year -- that if a two-fold project turned out this way then I would consider any other project, when more hands were in it, a very bad omen. The reason that we cannot use the auditorium, even after 3:30 p.m. for practice during the months of January and February, is because of the fact that the organ is rented to the students at the rate of 40¢ per hour.

And again, since about \$900 was spent last winter on heating the indoor track underneath the stadium, frankly I can see no urgent need for a field house at the present time. And too, it is necessary to possess the money for the initial start. With the present basketball set up the Athletic Association is not spending any money on basketball rental; and for the difference on what the Association might make with larger seating capacity in a new field house as compared to no expense at the present time, I am convinced that the Athletic Association would lose financially by a field house venture.

Very cordially yours,

Director of Physical Education,
Varsity Basketball Coach.

June 15, 1938.

Dean Frank T. Stookton,
School of Business,
University of Kansas.

Dear Frank:

I ask your pardon for the delay in answering your letter of June 2nd in which you ask for a report concerning the needs of the Department of Physical Education.

This week, as you know, I am conducting a coaching school, meeting with the coaches every morning, afternoon and evening. In addition to this I have been busy organizing the Summer Session softball league, in which there are six teams. Yesterday afternoon there were 60 men attending a meeting I had called to make plans for the ball teams.

Early next week I expect to send you a very fulsome and detailed report on the needs of the Physical Education plant. I feel that this is such an important matter that it cannot be done hurriedly.

Trusting the delay will not inconvenience you too greatly, and thanking you for your interest in our program, I am

Very sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.

FRANK T. STOCKTON
DEAN

Dr. F. C. Allen
Robinson Gymnasium
K. U.

Dear Phog:

Supplementing my telephone conversation I wish to put my thoughts down in writing. On behalf of the new committee of the Athletic Board, I will appreciate it if you will give me full and complete data concerning the plant ~~and~~ needs of Physical Education. I would like to have as much detail as possible. It seems to me that it is very difficult to segregate Physical Education from Athletics. Any data which you may be able to give me will, I am sure, be of great service to the Committee. I am asking Gwinn Henry to report on Intercollegiate Athletics so I presume that the basketball needs should be sent in through him. However, if you wish to add some material along this line I see no reason why you should not do so.

Cordially yours,

Frank T. Stockton

Ping Pong, Badminton, Deck Tennis

Valley Ball, Darts, Horse Shoes, BB

BB Soccer ^{volly Ball} 10-98 8 ft Baskets, Quoits, Croquet, Archery,

Concerning basket ball may I say that I discussed
- this matter with Director Edwin Henry.

I told him that I was less than mildly interested.
Since the auditorium was ^{built} primarily ^{as} an auditorium
and a basket ball court and that we were denied
the right to practice for our Varsity games therein even
for two months of the year, if a two fold project
turned out this way - then I would consider any
other project where more ^{hands} were in it, a bad one.
The reason that we cannot use the auditorium even
after 3:30 P.M. for practice for Jan and Feb is
because the organ is rented to students at the rate
of 40¢ per hour.

And again since about \$900⁰⁰ was spent
last winter on heating the indoor track under the stadium,
frankly I can not see the urgent need for a
field house, at the present time. And too
it is necessary to possess the necessary money
for the initial start. The way it is now
the Ath. Assn. is not spending any money
on basket ball rental and for the difference ^{or what}
the association might make with larger seating capacity
as opposed ^{compared} to the present expense, I am convinced that the
athletic association would lose financially by a ~~building~~ field house venture.
