THE KANSAS BASKETBALL OFFENSIVE EVALUATION CHART

*an*

This study was undertaken in ~~order~~ to attempt to find a means of evaluating offensive basketball. For years the generally accepted method of evaluating a basketball team or an individual has been on the number of scores that were made by the team or by the player. The development of a list of offensive elements was the first step. With that idea in mind a list of offensive elements was made and each activity or play was weighed subjectively. The weight of the item was given due consideration concerning its importance insofar as it contributed to the execution of sound fundamentals and to winning success. Of course, the objective was the successful scoring of field goals or free throws by the player.

The items used in the evaluation chart and their weights are listed below:
