Mr. Forrest C. Allen,
Director of Physical Education,
University of Kansas,
Lawrence, Kansas

Dear Sir:

I want to thank you for your letter of February 26th to which you attach data concerning the suggested trials of the '8 foot radius circle' in a basketball game.

I shall continue to be interested further in any action that would prove this suggestion as practical. Personally I am certain it would be an improvement and make for a much more interesting game of basketball from the spectator's standpoint.

Thanking you for the interest you have shown.

Sincerely yours,

GB:JL
