Dr. F. C. Allen
Basketball Coach
University of Kansas
Lawrence, Kansas

Dear Doctor Allen,

I am mailing the statistics you desired for the Kansas-Kansas State game here last night.

With a stop watch, the time to bring the ball from out of bounds after a goal across the division line averaged 5.7 seconds. Ranging from 2.5 seconds up to 12, the 28 trials required 160 seconds, or an average of 5.7.

In regard to held balls, there were 3 at the center ring, 18 at one end, and 5 at the other, a total of 26.

There were no goals scored by a team after gaining a tipoff before losing the ball to the opponents.

I will be glad to keep these data for the rest of our home games, and hope that the statistics may be of some value to you. If there are any more things you would like to check, please suggest them to me or Coach Root.

With best regards to you and your team the rest of the season, except on February 7,

Very truly yours,

Lawrence Grauerholz
