

OK

has pivoted to his (center) right.

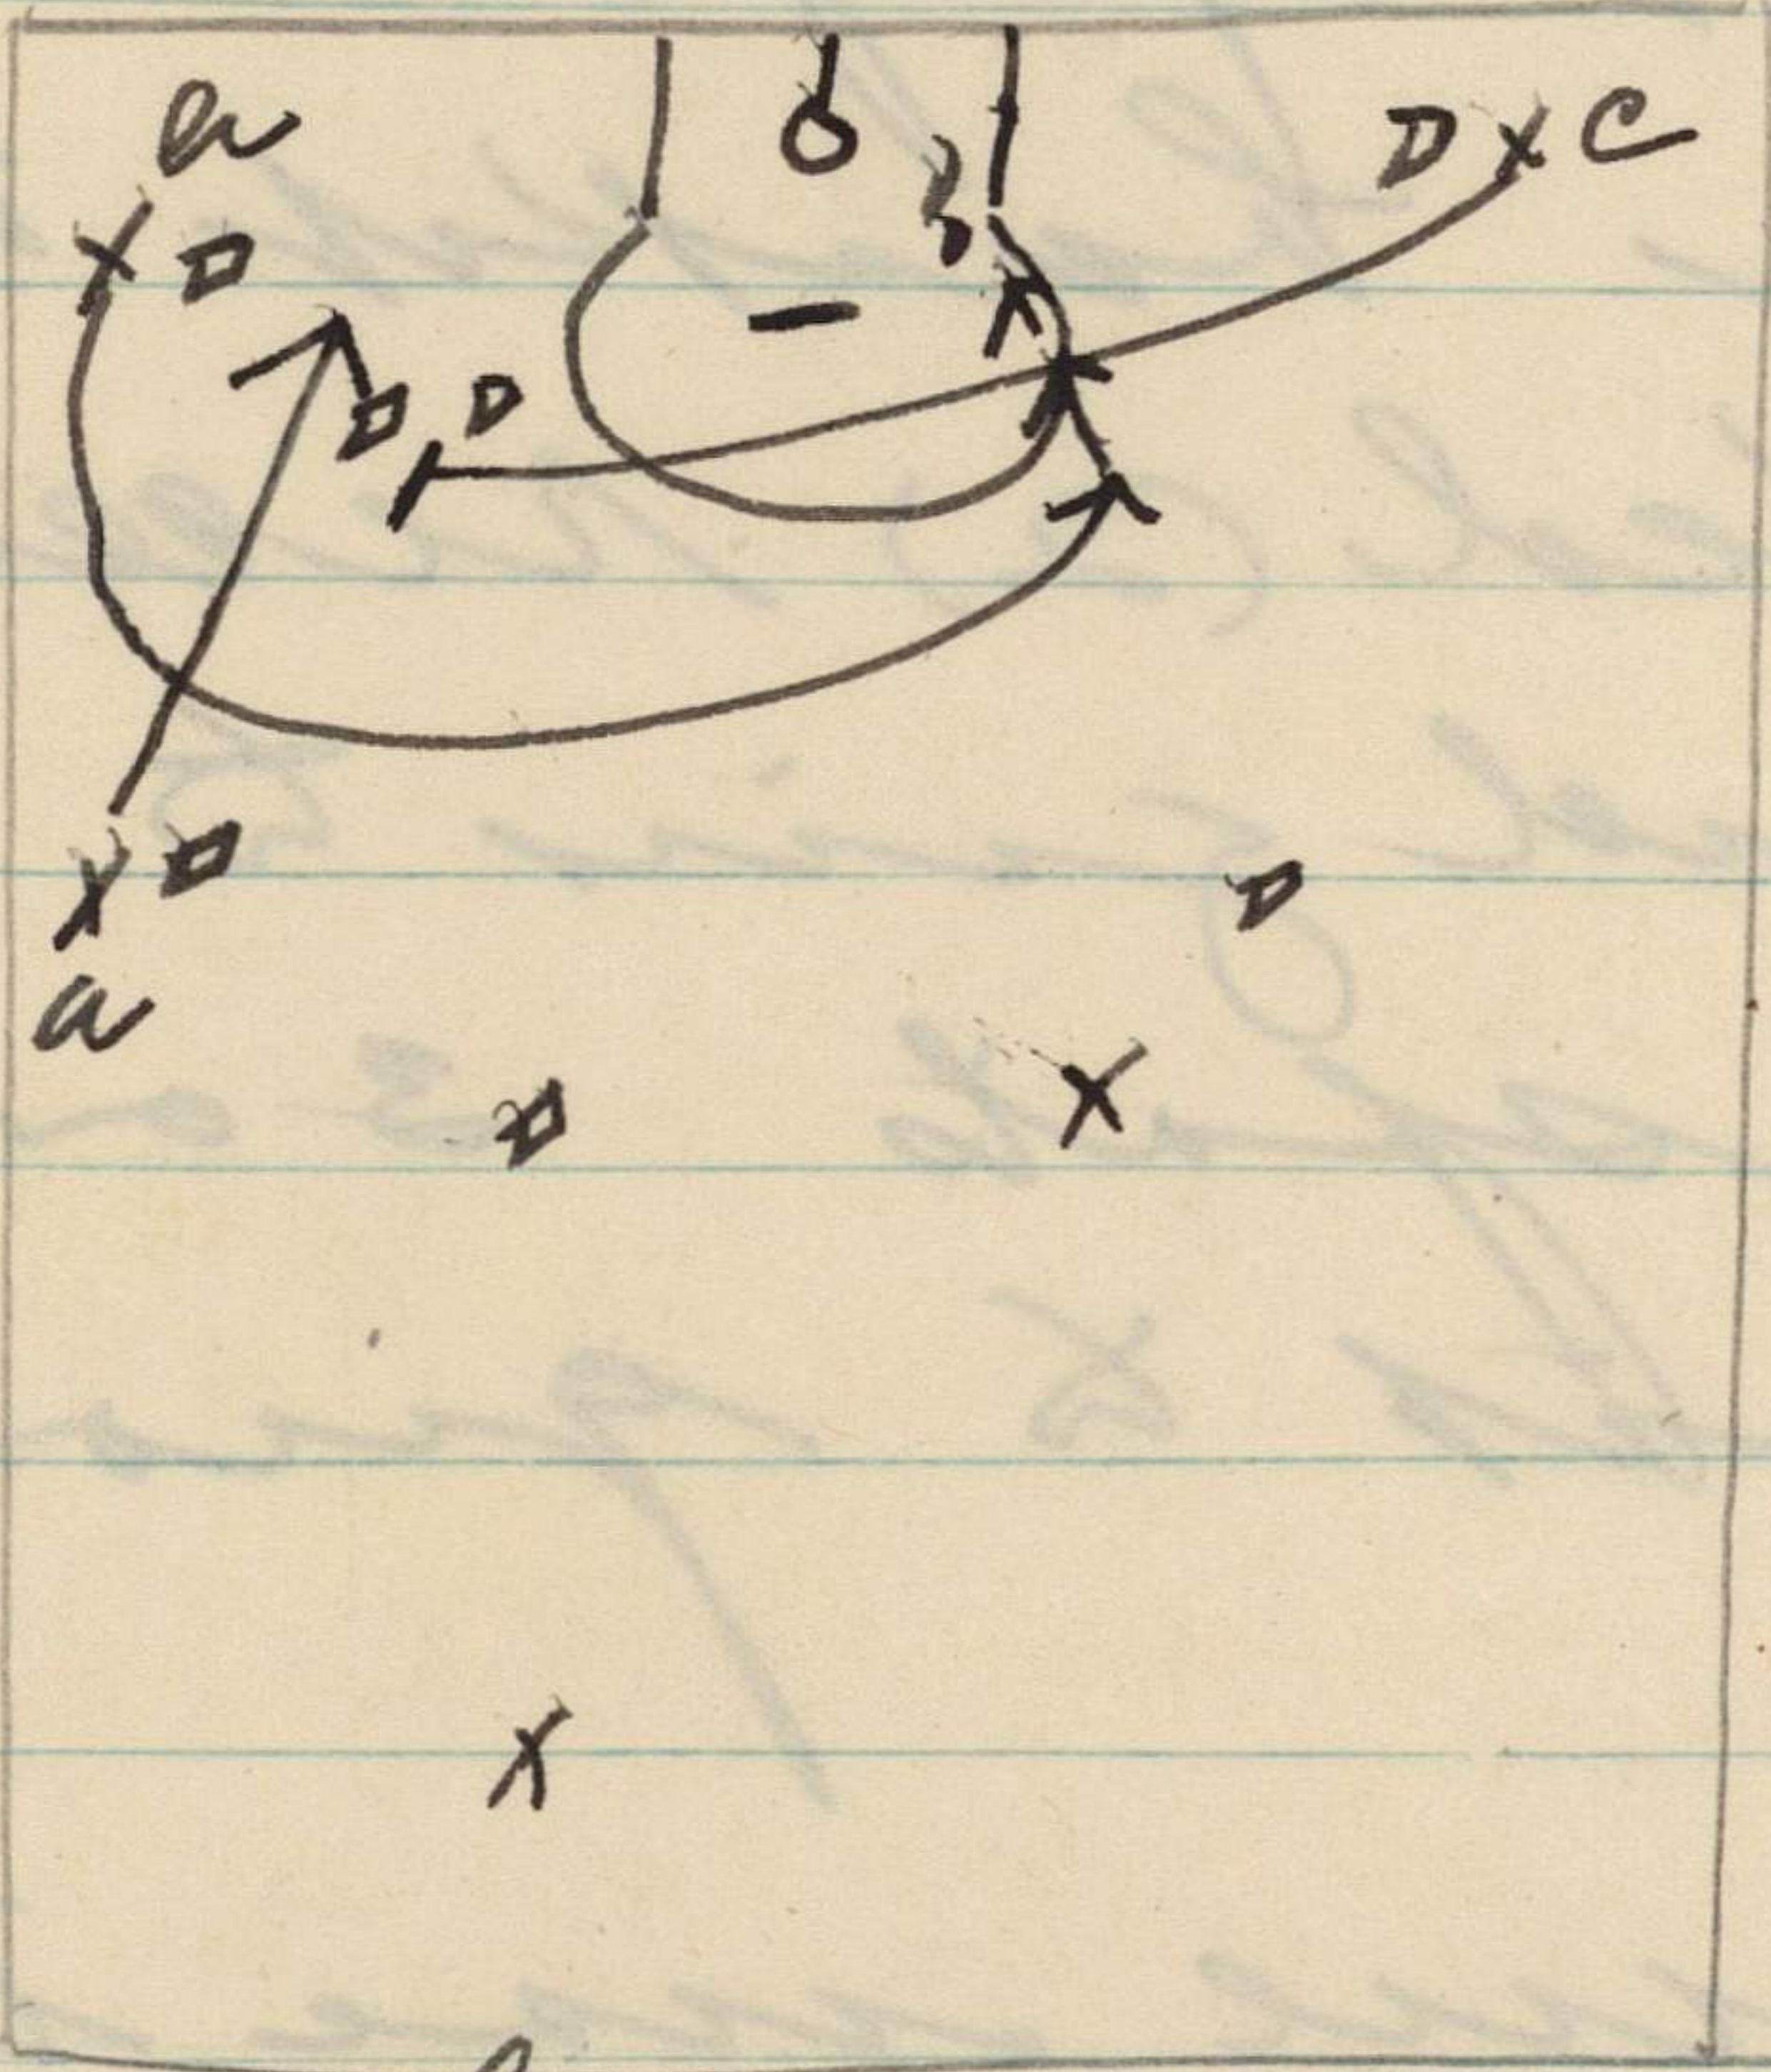

fig III

Now in fig III I have forward  $x_a$  &  $x_c$  come over to block guard on center  $x_a$  moves first <sup>backward</sup> then forward  $x_c$  comes over and gets in way for guard of  $x_a$ . Center  $x_h$  comes out of corner and gets to foul his as diagramed for a shot or pass or pivot.

To get thru 3-man set zone defense first use a passing lane as shown in your "Basket Ball Bible" diagram or figures four will show that. Variations may be shown from it if need be.
