

I don't know to whom you refer as the dear little lady from District 55 unless it was Lena Miller Owen, a sister of Vanroy Miller, and she is a mighty fine and capable woman.

In your first paragraph you spoke of ten-year government bonds. These are the United States Savings Bonds and bear interest at approximately three per cent. For instance, seventy-five dollars put into a bond today is presumed to mature \$100 in ten years and this rate of interest would not be enhanced even by the election of Willkie because the bonds are cashable but not transferable.

Let this letter be a letter to Grayce also. Much love from all of us.

Your brother,
