

have done for us in the arduous work of planting and I am sorry that it had to fall upon you.

Dolph and Marie will tell you about the report of Dr. Francisco on Gertie's condition today.

Your little brother has been a pretty busy man for about the past six months and while there is considerable work on hand yet, it looks as if daylight were just around the corner, not as far around the corner we hope as prosperity has been lurking for the past few years.

We shall join you at as early a date as seems advisable.

Lovingly your brother,

C.C. to Dolph.
