more trips before everything is laid by as being entirely satisfactory. I think I am right in saying that we have made nine trips to Kansas City. The new dentures are going to very closely represent the natural teeth that she had as a girl and young woman before pyorrhea began its work.

It looks now as if we might get away in ten days or two weeks. We shall certainly try to avoid the congestion which one meets just before, on, or after the 4th. Gertrude's Indian girl, Jaunita is willing, cheerful, and shows a disposition to try to save Gertrude as much as possible. She is only eighteen and has a good deal to learn. Oddly enough, the Indian girl who will also accompany us to Minnesota to be with Grayce and Don, is named Grace. After all, there should be three Graces but I don't know who will have to fill the part of the third.

We find that the casement windows and new screens are all in on our porch at the Lake, which will add greatly to our comfort while there. It always turns cold about the last of August, so that our vacation of necessity will have to be shorter than usual.

Letters from Dolph Jr. indicate that he is getting along nicely and tomorrow he spends in Denver with a young college man 6 feet 5 inches tall, who will take him in tow. He seems quite happy in his work.

John has been working in the advertising department for the past week and is showing an aptitude for the work. He and Clayton Stone are expected to carry on next week while Jackson and Ernie are on vacation.

With lots of love and best wishes, I am, as ever,

Lovingly,

WCS:jm
