

JAMES A. McNALLEY, M. D.

304 MELLETT BUILDING

CANTON, OHIO

Monday P.M.

Dear Leo & Janet:-

I am enclosing a copy of a letter to Teduk. I am sure it will explain. Anna told me Janet's mother had Ca, and that prompted me to inform you of Dioptrin. Teduks are very reluctant to release this substance, but we have a nurse at Mercy Hosp who is getting Dioptrin and doing very well. Several of the doctors here have tried to get it without results. So I thought I would try.

It might be worth a try, but pressure applied through correct channels is necessary to obtain it. W.C., & his doctor could do that I believe. Will let you know how I come out.
As ever, Jim
