She has been for years after she
gets well. we hope - We had her
and family for Thanksgiving
dinner and I have been sending
our things to eat everyday until
we have them over here.
We went in to see Ruth the night
of her operation and Don got one
whiff of the air saturated with ether -
and it upset him so that a little
later he had to vomit - and his stomach
was upset for several days afterwards.
Well all is well that ends well -
and Ruth said she was so happy
it was over and she at home again
I love you very much -
Don tells me to look ahead in-
stead of into the past - Love to Dolph
and families and any of the ones who are with
you - affectionately G.
