

MRS. DON ALFRED FREEMAN
TREE TOPS, GULL LAKE
BRainerd, MINNESOTA

We are not as fortunate as
you and Dolly in having
a fish organization - to depend
on for us, whether we are
here or away. - I only wish
we had.

The lake is very low - but
when says it - will be better
for the fish when spawning
as they will have to go out
further in the lake now
and when the water is let
back in - it will not disturb the
small fish -
