

Pajarito of Lima Peru was here last week; Dr. C. J. Hoopjya of Holland is spending the next 10 days here. It is good, of course, to exchange views and opinions with these men whose interests in science parallel ours (Kelso's & mine) and we hope to be more useful to the University of Kansas when we return.

From all I read, Dolph Jr. is a mainstay on the K.U. team and has, I see by The Washington Times Herald, a high national ranking as a punter. Through Ben and my wife I gather that John is showing up very well on the Freshman Squad. You have cause on these, and other grounds, to be proud of your grandsons who give every promise of carrying on the name Simons with distinction.

If convenient give my regards to Dolph. A specific message could be that the Graduate Magazine is much improved.

Again, thanks so much for your assistance at the museum. I aim to be home over the holidays and hope to see you then.

Sincerely,
E. Raymond Hall
