

dynamite goes down rather than up, and it would have a tendency to loosen the subsoil. I don't know how it would work, but I believe it would be worth trying. I planted some trees on the ten acres that I used to own on West 9th Street, and had each hole dynamited. The result is that the trees are still living, although the ground has passed through many hands.

I think Mary Beth will have to be quite careful of herself for the next 40 or 50 days, because we do not want anything to happen to her. I have been very happy to have you drop in on me so often, and hope you can continue to do so.

Lots of love,

Dad
