

Silver City, N.M. 11-23-1927.

Dear Lollie

Your letter of 29th received this morning. I think the first thing we should do is to secure a patent on our medicine as soon as possible. I have no facilities for preparing it here, and cannot send to druggists around me to have it put ^{up}. I have had a few come to me since I came here and all who have taken it for only a few doses are perfectly delighted with it & want I should put up more. Friday morn. I am going to Council Bluffs & get what I want there for once. Maybe Julia has given the formula to Dr. Galdiner, as she never said anything about doing any ^{thing} with it since. She would get a patent on it quick if she thought it would block me, or hurt you or Gertie. She has less love for you two than for any the rest of the family. She is jealous & envious of you both & always was. Do not tell her anything about this business, nor
