

2721 E. 75th Place, Chicago, Ill.  
July 8, 1930

My dear Callie:

I wish you as many happy days as you wish. This is Linn's wish as you know and a good wish.

Uncle and I left Mr. Swamy - as we believe - 6 bottles of stomach medicine. I did not know whether should retain and what end us or you when he departed. I suggested that you write him as you may recall.

After we had been in Chicago a little time I wrote Mr. and Mrs. Swamy that Uncle made the trip well etc. After Uncle had been here a month and had taken an examination by an expert physician I wrote again. Uncle visited them to know that he was in excellent condition. The Macedonian physician said his blood pressure was high about 190 I believe. The doctor has found it between 140 and 145 and told us that was the pressure of a man 40 to 45 yrs. old. His pressure normally expected was a persons age plus 100. This physician found his heart strong and in good.
