

DON'TS

- DON'T** expect to get good results from snap shots made before 8 a. m. or after 5 p. m. even if the sun is shining.
- DON'T** try to make snaps in the shade, or under trees; rest the camera on something solid, and give from one-half to ten seconds.
- DON'T** hold the camera in your hands when making time exposures.
- DON'T** give a time exposure for long distance views. The farther the subject the less time required. Don't point the camera toward sun or window.
- DON'T** make snap shots indoors; rest the camera, and time according to light of room or use Actino Flash Powder.
- DON'T** forget to ask for information and pointers; it costs nothing at the Lawrence Studio.
- DON'T** jolt the camera in pressing the button—fifty per cent of failures are due to this.
- DON'T** forget to buy your films from us.
- DON'T** forget to bring or mail your films to
