

And a proved thing for a pluresey
to cure it with out leting blood L. C. G.

Take a handfull of ueruene and stampe it and the
whit of and ege mixe with it and ^{a handfull of} some barley meale
and so mingell it all well together and make a plaister
and lay to the side whear the paine is and it will
dray a way the cruope blood and cure them with
out leting blood let the plaister be changed once
in 12 houes and another fresh one laid on. . .
let the plaister be as broad as the paine is in the side
if you have not barley put flower or meale it must be laide on
flax tow ^{wornd} for the scoruey proved thing ~~to more~~
and a little

Take a quarter of a pound of scoruey grass and
a quarter of a pound of curance and a quarter of a
pound of suger wash the curance and pick them ve
ry cleane and dry them in a clath and wash the
scoruey grass very cleane and dry it in a cloth
and then stampe them all in a mortar together
till it be beat as fine as conserue and then eat
of it in the morning fasting and at 3 a clock in
the ~~morning~~ afternoone and in the morning fasting
as much at a time as a walnut or a nutmeg proved
Sorell water is ~~the~~ very good in a feuer to
drink to quench thirst Wood Sorell is best

Conserue of elder flowers are the best to take the pores
in for the dropsey the powder is called gambodrom.
