

it one a cloth for a plaister then haue in a bedines
a litle and a droppe or too of honey and lay it to
~~the cut worne~~ melted together in a sponne uery hot
wet your plaister in the buter and honey and lay
it to the cut worne if it be a deepe cut lay one
a good pece of lint well wet in all thes and a
plaister ouer it all

For the Small poxe

When you perceiue the pox is coming out keepe the
party worne in their bed and in a gentell sweet but
not to hot lest you bring them out the fuller giue
them dragone water and metredate once or twice =
if you see occasion or safrant and milke and let th
em take dragon water a boue twice or thrice a day
and be for you giue them not to many hot things and
if they lye in the throat then giue them a may w
eed posat if you can get it but let them ~~ge~~ drink
noe hot things but a litle wormed let them garg
el with kee beare euery 2 hours but drinke none
downe you must use this Aplicacion if they be m
uch in the throat take hearbe grace and heat it be
twene two tihs and lay it to the throat uery worm
it will keepe them out of the face and the uenome
out of the throat they must eat noe meat till ten
days after they come out nor raw drink but th
is posat drink make your posat uery cleare then p
ut in a good quantity of marey gould flowers and
harts horne and boyle them well if the party be m
uch troubled with a cofe you must put in Anyseed
s and lickrish and 9 or 6 figes else the posat also
ne clarified uery cleare to wash the eyes to k
