

Mackorons may be culored greene with spi
nege or you may culer them of what culor you
pleas it is used much by confetionars and it lo
ks uery well and eats well - - - - -

A uery good purge

Take halfe a pint of whit wine and lay ther in
30 kaisons taking out the stones and 2 or 3 koots
of polipodioume cleane washed and cut in 3 or
4 peces a sponefull and a halfe of senev and 2
sponefulls of any seeds both together let them sta
nd all night in a close pot then seeth them to a
quarter of a pint and straine them all together
and drink a draht fasting - - - - -

To prepare and use leches which will
be good to use after mid Aprill to draw
a way mallancally blood - - - - -

First to prepare them take them and put them
into a uiall full of pond water and thear let them ke
maine 2 or 3 days and then they are kedy to be used
and it is not best to keepe them much longer then le
t the pacient lye upon a bead with a dubled sheet
wormed and with a can 2 inches long set neere y
fundment put one leche in and lay a litell paper
one it and with your thume keepe the lech in till it
befasned and then put in and other in to the cane
and let it fassen and so doe till you have an use
one as you shall think best you may use 3 or 4 or
5 at once all of them must be fasned with in and
each of the fundament one the side but none above
