

The GREAT SHIFT of '98

University of Kansas Libraries

Here's what's happening now:

The KU Library is moving collections this summer and fall in an effort to best use existing and new book stack areas. Books and journals have been relocated from and into Watson Library, Art and Architecture Library, Engineering Library and the Anschutz Library. A new stack area, Anschutz 1 North, is being filled with older materials from the Watson collections. These older books and journals from Watson (Dewey call numbers 001-799) are being relocated to provide growth space for newly received materials. All currently received serials and periodicals have been removed from the collection which is being transferred to Anschutz, and are presently shelved in a location called Watson 1 % East Temp, awaiting integration with the main Watson collection. KU theses and dissertations from Watson, Art and Architecture and Anschutz are being combined into an integrated collection on the first floor of Anschutz. For more information on these topics, please consult the Libraries' web page at <http://www.lib.ksu.edu>.

As of September 2nd, the following call numbers have been removed from Watson and relocated to Anschutz 1 North:

Watson Dewey Collection: 001-338.96
East Asian Dewey Collection: 001-381.1
Watson and East Asian Dewey follow: 001-799

All materials which have been moved from Watson must be requested at the Watson Circulation Desk, and should be available within 24 hours. Anschutz 1 North will be open to the public after the move is completed in late September.

1-1/2 East Temp Information (subject 927.9)

Periodicals previously classified in Dewey Decimal numbers 601-699 that are still active have been reclassified as 1-1/2 East of Congress call numbers.

In Watson Stacks, these volumes are temporarily shelved in the 1-1/2 East and 7 West Stacks between the time they are removed from their old Dewey location and the time there is sufficient shelf space to hold them in their new call number range.

If the online catalog location recorded in Watson Stacks (1-1/2 East Temp), consult this list to help find your call number. Please note that some items with this location have actually been shelved at 3 West.

Please ask library staff for assistance if you cannot locate an item.

The following list notes where particular call numbers can be found on 1-1/2 East and 7 West in Watson Stacks.

The following call number sequences are shelved on 1-1/2 East in Watson Stacks:

For titles reclassified from 001-799:

Range 15 - A1-19, 78-86 - AP-50, 578-589-8
15th edition is 200-165, the 1-2 sequence begins 601-699, designated as 1-1/2 East Temp, first 19 volumes of Range 15 are now empty
